Guidelines for Blood Lead Screening and Lead Risk Assessment**

- **Blood lead screening** is defined as obtaining a blood lead test. **Lead risk assessment** is defined as evaluation of potential for exposures to lead based on questionnaire responses.
- **It is always appropriate to obtain a diagnostic blood lead test when a child is symptomatic or potential exposure to lead has been identified, regardless of child's age.**
- Illinois has defined ZIP code areas at high risk and low risk for lead exposure based on housing age and poverty rates. Review the list of ZIP codes and determine status of ZIP codes in your area.
- In Illinois, all children from **low-income families** (i.e., Medicaid-eligible children) should receive a blood lead test at ages 12 and 24 months, even if they live in a low-risk ZIP code area. If the child is 3 through 6 years old and has not been tested, a blood lead test is required.

Childhood Lead Risk Assessment Questionnaire

- Complete the Childhood Lead Risk Assessment Questionnaire during a health care visit at ages 12 and 24 months.
 - If responses to all the questions are “NO,” re-evaluate at every well child visit or more often if deemed necessary.
 - If any response is “YES” or “DON'T KNOW,” obtain a blood lead test
- Consider evaluating children before 12 months of age, depending on the area.
- If the child is age 3-6 years **and**
 - 1) there is any “YES” or “DON'T KNOW” **and**
 - 2) has had two successive blood lead test results that were each less than < 10 mcg/dL with one of these tests at age 2 years or older **and**
 - 3) risks of exposure to lead have not changed, **further blood lead tests are not necessary.**
- If the child is 1) 3-6 years, **and** 2) all answers to the Childhood Lead Risk Assessment Questionnaire are “NO,” **and** 3) risks of exposure to lead have not changed, a blood lead test is not necessary.
- If the child is 3-6 years of age and risks of exposures to lead have increased, obtain a blood lead test.
- Continue to use the Childhood Lead Risk Assessment Questionnaire through age 6.

For children living in Chicago:

- A blood lead test for children age 3 and younger should be obtained at 6, 12, 18, 24 and 36 months **OR** at 9, 15, 24 and 36 months.
- Children 4 through 6 years of age with prior blood lead levels <10 mcg/dL should have an annual risk assessment. A blood lead test should be performed if risk increases or if the child exhibits persistent oral behaviors.
